RE: SUBSCRIBER NOTIFICATION REPORT
(WC Docket No. 05-196)

We have been advised that as a reseller for an interconnected VoIP service provider that we are required to submit (to you) the steps we have taken to comply with the FCC order requiring interconnected VoIP service providers to provide E911 capabilities to their subscribers.

Since receiving this instruction, we have initiated an aggressive campaign attempting to reach each of our subscribers, both those with E911 service and those without, through email sent 7/21/05 – 7/28/05 and voicemail messages sent 7/27/05, and again on 8/3/05, advising them that we must receive acknowledgement of receipt and acceptance of the limitations of E911 service in order to maintain service.

To date, we have received acknowledgement from approximately 50% of our subscribers. In the coming weeks, we will further our effort by repeating the

steps described as necessary and pursuing additional means of contact. A record of affirmative acknowledgment by every subscriber, both new and existing, of having received and understood the advisory is on file with ***RNK Telecom - 333 Elm Street Dedham Massachusetts 02026***

As further required, we will be distributing on August 15th, via United States Postal Service, stickers to all subscribers, warning that E911 service may be limited or not available and instructing the subscriber to place them on or near the equipment used in conjunction with the interconnected VoIP service.

Should you require any further information, I may be reached at the number below.

Michael A. Propper, Vice-President
